Fees	No fees are payable in respect of the Units.

Key Risks Overview

A summary of the Key Risks are outlined below. Potential Investors should refer to the Term Sheet PDS and the Master PDS for a comprehensive overview of the risks prior to investing.

- **Capital invested in the Units is at risk.** There is no capital protection or guarantee of financial return in respect of your investment in the Units.
- **Credit exposure to Reference Entity:** The Units are linked to the performance of the Reference Asset and the performance of the Reference Asset depends (among other things) on the Reference Entity meeting its obligations under the Bond, therefore the Units include an exposure to the credit worthiness of the Reference

¹ As the notes are unsecured, Investors should note there may be circumstances in which the notes may be effectively junior to any secured indebtedness of the Reference Entity, despite being classed as senior notes.

² Refer to Section 1 “Timeline” of the Term Sheet PDS for more information on Key Dates. Assumes no Early Maturity, Par Call, or Early Optional Redemption.

³ Anticipated Commencement Date 31 August 2022 or as soon as reasonably practicable as determined by the Issuer. Subject to change and to be confirmed to Investors in the Confirmation Notice.

⁴ AUD hedged for Coupons and Final Value except in relation to an Alternate Maturity Date (Par Call), Early Optional Redemption of the Bond by the Reference Entity or an Early Maturity Event, Adjustment Event or Issuer Buy Back. Refer to the Term Sheet PDS for more information on Alternate Maturity Date (Par Call), Early Optional Redemption and Early Maturity risks.

Entity and include a risk of capital loss and loss of income in part or in whole, as the result of an Early Maturity Event occurring.

- **Value of the Units before the Maturity Date.** The Final Value of the Units is calculated by reference to the performance of the Reference Asset. As such, the market value of the Units before the Maturity Date will be determined by many factors. These include: the likelihood of a Bond Default Event, Early Maturity Event, volatility of the Bonds; time to Maturity; interest rates; exchange rates; general market risks, including but not limited to, general index movements, macro- economic risks and supply and demand; fees and costs; and perceived creditworthiness of the Hedge Counterparty. In the case of an Early Maturity Event (including a Bond Default Event or a repurchase of Bonds upon a change in control of the Reference Entity), an Adjustment Event, an Alternate Maturity Date (Par Call), an Early Optional Redemption of the Bond by the Reference Entity, or an Issuer Buy-Back, the foreign exchange hedge may not apply and investors may have exposure to the AUD/GBP exchange rate. Investors should be aware the Units are designed to be held to Maturity and are not designed to be a trading instrument. The Issuer may issue additional series of Units in the future. The Issue Price for these Units will reflect (amongst other things) the prevailing market conditions at the commencement date of those units, and which may be different to the market conditions as at the date of the Term Sheet PDS.
- **Bond Default Event (by the Reference Entity).** The Units may mature early (Early Maturity Event) following an event occurring in relation to the Reference Entity or the Reference Asset, which may be caused by the Reference Entity or any guarantors of the Reference Entity. These include: Optional early repayment of the Bond, Bankruptcy, Failure to Pay, Obligation Acceleration, Obligation Default, Repudiation/Moratorium, Restructuring, Governmental Intervention, Conversion, Material Event.
- **Repurchase Upon Change of Control Risks.** Upon a change in control of the Reference Entity and any resulting negative impact on the rating of the Bonds, the Reference Entity may have an obligation to accept offers to sell back the Bonds to the Reference Entity. The Reference Entity may not have sufficient funds to repurchase the Bonds in cash or may not have the ability to arrange necessary financing on acceptable terms or may otherwise be unable to repurchase Bonds in the event it is required to accept an offer to repurchase Bonds. Failure to repurchase the Bonds as required would be likely to result in a default under the terms of the Bonds, which could have material adverse consequences for the Reference Entity and in turn the holders of Units. The ability to require the Reference Entity to repurchase the Bonds may be subject to legal uncertainty, which may have an adverse effect on the Bonds and holders of Units.
- **Foreign Exchange Risk (FX Risk).** In the case of an Early Maturity Event (including a Bond Default Event), an Adjustment Event, an Alternate Maturity Date (Par Call), an Early Optional Redemption of the Bond by the Reference Entity or an Issuer Buy-Back the foreign exchange hedge may not apply and investors may have exposure to the AUD/GBP exchange rate.
- **Performance of the Reference Entity and the Bond.** Historical performance of the Reference Entity should not be taken as an indication of the future performance of the Reference Entity during the Investment Term. The performance of the Bond depends on the Reference Entity meeting its credit obligations in respect of the Bond and not on the overall financial performance of the Reference Entity. An investment in the Units will perform differently to an investment in the shares of the Reference Entity or a direct investment in the Reference Asset.
- **Secondary Offer Period:** Investors who purchase Units in the Secondary Offer Period at an Issue Price greater than the Initial Issue Price of \$100.00 will receive a lower overall return, as the Final Value and Coupons are calculated with respect to the Initial Issue Price of \$100.00 per Unit.
- **Liquidity risk.** You may not be able to realise your investment when you want to. The Issuer Buy-Back facility is at the discretion of the Issuer. Issuer Buy-Back requests are determined at the Issuer's discretion.
- **Early Maturity.** The Units may mature early following an Early Maturity Event or Adjustment Event, including as a result of an Alternate Maturity Date (Par Call), Early Optional Redemption Event, or if your request for an Issuer Buy-Back is accepted. No further Coupons are payable following any of these events (excluding any accrued but unpaid Coupons) and the Final Value may be less than the Issue Price.
- **Counterparty Risk.** Investors are subject to counterparty credit risk with respect to the Issuer and the Hedge Counterparty (and indirectly to the Reference Entity and any guarantors of the Reference Entity).

For a copy of the Term Sheet PDS and Master PDS, please contact your adviser, or C2 Specialist Investment at <https://c2financialgroup.com.au/investments/>
